

Client Feedback Notes

- Clean layout and easy to navigate.
- Runs smoothly.
- Tables are useful, can calculate costs efficiently.
- Tables and form editor are easily accessed, but _seq tables are a bit weird or troublesome to scroll through.
- Form editor is easy for the client to use.
- Form editor on MySQL workbench is not very attractive.
- Liked the views - information about documentation is all in one spot.
- Liked the filter function but forms for each field would be better.
- Have to keep going back after filtering many times - a home button would be useful.
- Very happy that they don't have to manually create documentation anymore, but it is a bit of a hassle having to search for IDs in the database, before being able to generate documentation.
- Responsiveness helps with the habit of multitasking, but it feels a little bit too cramped.
- Data validation helps with inaccuracy with the keyboard - hard to use for them.
